Training

No other competitor has EM-Assist's unique depth of experience in both environmental science and training solutions. This strong mix of in-house training and environmental expertise, coupled with our extensive project portfolio, guarantees that we have the capability and experience to complete all parts of environmental interactive training development.

EM-Assist has developed over 120 environmental Web-based courses and more than 300 Web-based **Rapid Learning Objects™ (RLOs)** for more than 40 different clients, including the EPA, DOJ, Air Force, Army, National Guard, Ready Reserve Command, Marine Corps, Navy, and the Army Corps of Engineers Learning Center.

RLOs are EM-Assist's own trademarked 5- to 10-minute training modules designed to get instruction to targeted individuals quickly. With RLOs, students only receive training directly relevant to their specific role within an organization.

A sample of environmental topics covered by our custom interactive training development services includes:

- Air Pollution – for Elementary School Children
- Air Quality Awareness
- Air Quality Compliance – Paint Booths and Abrasive Blast
- Alternative Fuel Vehicles – Awareness and Instructions

Omni
Intermedia Award

The quality of EM-Assist's courseware is demonstrated by the multiple awards we have received. Most recently, a game-based course developed for the U.S. Marine Corps was the basis for a prestigious Brandon Hall Gold Award.
