

Training Solutions

Training Solutions

EM-Assist helps clients deliver the right training to the right people at the right time by cost-effectively blending custom eLearning courseware with instructor-led training, and by enabling efficient training program administration through powerful, easy-to-use learning management systems.

Turnover, changing job responsibilities, and complex and dynamic training requirements combine to create intense demands on managers of training programs. We understand these challenges, and we realize that our clients' training programs exist to support broader missions. Our comprehensive training solutions support our clients' operational needs, reduce training costs, and align efficiently with existing business practices.

EM-Assist helps clients achieve their training program objectives by collaborating with all stakeholders and thoroughly understanding each client's vision, culture, student characteristics, administrative and compliance requirements, and budget. We offer strategic options from program planning to task-specific training, and we focus on each client's return on investment to create effective custom training solutions that deliver results with the optimum balance between long-term program costs and program benefits.

Results include lower long-term costs, reduced administrative burden, improved compliance, and greater training effectiveness. This enhanced overall program performance enables our clients to more effectively support their broader mission.

EM-Assist Training Solutions

Our team of experienced instructional designers, multimedia developers, and subject matter experts creates innovative, award-winning training solutions across a wide range of subjects. We develop targeted training using various media and delivery methods to ensure student engagement, comprehension, and knowledge retention.

An EM-Assist **Learning Management System (LMS)** is a customized, Web-based application that efficiently administers each client's unique training program. Our SCORM 1.2 and 2004 conformant, Section 508 compliant LMS enables clients to deliver blended learning solutions by easily managing, delivering, and tracking eLearning courseware and instructor-led training throughout their entire organization.

We create Web- and computer-based **Custom eLearning Courseware** that is SCORM 1.2 and 2004 conformant and Section 508 compliant. Our eLearning courses range from concise, focused Rapid Learning Objects™ to complex, highly interactive simulations and games.

Our **Instructor-Led Training** services include project-based, part-time, and full-time client-site instruction from our subject matter experts who have a strong command of today's classroom training environment. We also provide support services and develop multimedia training aids to facilitate and reinforce effective classroom learning.
