

EM-Assist Adds Depth to its Sustainability and Green Procurement Practice

FOLSOM, CA – October 1, 2010 – EM-Assist, Inc., a leading provider of environmental services and training solutions, is pleased to announce the recent addition of N. Shawn Holsinger, P.E. in our Williamsburg, VA office. Shawn is recognized as one of the principal architects of performance-based contracting in the Department of Defense (DOD), and his experience in implementation of environmental programs for both the Army and Air Force brought a new perspective to methodologies for effective implementation and tracking of success for environmental programs. He has been instrumental in developing and implementing Federal clients' sustainability and green procurement process improvement strategies, which will be his primary area of focus within EM-Assist.

Shawn Holsinger, P.E. is an environmental engineer with nearly 25 years of technical experience within the Federal sector. He has served as a program manager and provided oversight of technical services for large contract actions for the DOD, Department of Energy (DOE), Department of Homeland Security (DHS), and other Federal agencies. He previously served as the Environmental Restoration Branch Chief at Air Combat Command (ACC). While at ACC, Mr. Holsinger pioneered several innovative initiatives such as Future First Planning (F2P) and Performance-Based Restoration (PBR) aimed at accelerating remediation program closeout, which to date has shown a \$70 million cost savings while simultaneously reducing the schedule to complete by 30%. While working for the Army, Mr. Holsinger focused on implementation of the Army's performance-based contracting efforts and he championed innovative approaches to cleanup such as Guaranteed Fixed Price Remediation (GFPR) projects on active DOD installations.

Most recently, Mr. Holsinger held a senior position with LRS Federal, LLC. He can be contacted by phone at (757) 810-2475 or by e-mail at SHolsinger@EM-Assist.com.

"Within Department of Defense environmental circles, Shawn is recognized as a thought leader known for his creative approaches to solving complex problems," said Brian Perry, EM-Assist's Director of Client Services. "Federal clients are increasingly turning to EM-Assist to meet their most challenging environmental and sustainability needs, and we're excited that such clients can now benefit from Shawn's deep expertise in emerging areas such as green basing and green procurement."
