

EM-Assist Receives Government Certification for its Learning Management System Software

FOLSOM, CA – October 8, 2010 – EM-Assist, Inc., a leading provider of environmental services and training solutions, is pleased to announce that its Learning Management System (LMS) software recently received a Certificate of Networthiness (CoN) from the United States Army. The LMS is a configurable, Web-based software application that enables clients to plan, implement, and assess specific learning processes by allowing them to easily deliver and track eLearning courseware and instructor-led training throughout their entire organization. The CoN certification allows EM-Assist's LMS to be more easily configured and deployed on any government server within the U.S. Army, Army National Guard, and Army Reserves.

EM-Assist recently configured and deployed its LMS software to Army clients including Fort Hood in Texas; Fort Monroe in Virginia; and Tooele Army Depot, Dugway Proving Ground, and the U.S. Army Reserves 96th Regional Readiness Command (RRC) in Utah. In addition, EM-Assist's LMS is used by numerous Army National Guard states and many U.S. Marine Corps installations throughout the country.

"Over the last several years we have observed many Federal clients becoming increasingly frustrated by the lack of quality technology solutions available to help them manage their environmental and training information in an easy and cost effective way," said Jeremy Burr, EM-Assist's Chief Executive Officer. "During this same period, we have invested heavily in our information management practice to develop software products to meet this need. Receiving the Certificate of Networthiness for our LMS is an important milestone as we continue our long-term commitment to developing and supporting leading-edge information management tools for our Federal clients."

Other EM-Assist information management software products used by Department of Defense clients include the Environmental Data Integration System (EDIS), a software product that helps clients easily and cost-effectively manage many aspects of their environmental and sustainability programs. EDIS can be configured to meet each client's unique needs through the addition of various modules, including an Environmental Management System (EMS) module and a Hazardous Materials / Hazardous Waste (HM/HW) module.

ABOUT EM-ASSIST

EM-Assist, Inc. is government's trusted partner for environmental program management, technical support, and training solutions. The company helps clients cost-effectively address their most challenging environmental compliance, information management, conservation and planning, and restoration needs. EM-Assist also helps clients deliver the right training to the right people at the right time by blending custom eLearning courseware with instructor-led training, and by providing efficient training program administration through powerful, easy-to-use learning management systems. EM-Assist, founded in 1996, is headquartered in Folsom, CA and has 140 professionals in multiple offices throughout California, Utah, Colorado, Virginia, and North Carolina. Additional information can be found on the company's Website located at www.EM-Assist.com.
